	Companies are recommended to assess the risks related to the potential theft or compromise of their technology, data or intellectual property in connection with their operations, as well as how the recognition of			
	3,,			
	these risks may impact their business, including their financial condition and results of operations, and any			
	effects on their reputation, stock price and long-term value. Where these risks are material to investment and			
	voting decisions, they should be disclosed, and we encourage companies to provide disclosure that allows			
	investors to evaluate these risks through the eyes of management. Please note that disclosure about these			
	risks should be specifically fit to a company's unique facts and circumstances. We trust that corporations			
	should continue to consider this growing area of risk and evaluate its materiality on an ongoing basis.			
	Could be the Course of the state of the stat			
	Further, the Company should not make such detailed disclosures that could compromise its cybersecurity			
	efforts – for example, by providing a "roadmap or product details" for those who seek to penetrate a			
	company's security protections. However, companies should disclose IT governance and cybersecurity risks and			
	incidents that are material to investors, including the associated financial, legal, or reputational consequences,			
	if any.
